

ANTONIA WATTS

Colchester, Essex | antoniawatts01@gmail.com | [antoniawatts.github.io](https://github.com/antoniawatts) | linkedin.com/in/antoniawatts/

EDUCATION

University of Essex

Colchester, Essex

Bachelor of Science with Honours: Computer Science, President of Esports Society

June 2028

- Relevant Coursework: Software Engineering, Application Programming, Object-Oriented Programming, Web Development, Fundamentals of Digital Systems, Data Structures and Algorithms I & II, Computer Security, Databases & Information Retrieval

EXPERIENCE

Fullstack Web Developer

July 2026 – Current

Rescue Air

Remote

- Serve as sole developer for a local HVAC business based in Tennessee, handling development, deployment, maintenance, and ongoing improvement of the company's customer-facing website
- Built a Next.js and Vercel API endpoint to process contact form submissions and integrate Resend's email API.
- Implemented SEO fundamentals to optimize customer traffic, improve search visibility, and build business credibility

STEM Education Facilitator

January 2025 – June 2025

Girls Who Code

Tucson, AZ

- Mentored grades 6-12 students in core computer science concepts through coding instruction & debugging support
- Led teams developing applications spanning Python, AI, robotics, game development, and web design
- Facilitated educational presentations and class discussions highlighting women in STEM and inclusiveness

PROJECTS

Internship Application Tracker

Go, Next.js/React, Typescript, PostgreSQL, Docker

Current

- Developing a full-stack web application that allows users to track internship application progress
- Designing the PostgreSQL schema and database layer to support the Go API's CRUD operations for application tracking

Portfolio Website

HMTL, CSS

July 2026

- Built a four-page responsive website using pure HTML and CSS to showcase personal achievements
- Designed custom page layouts, navigation, and interactive formatting without templates or external libraries

Heart Disease Machine Learning Model

Python, Pandas, scikit-learn, Colab, Tuleap

May 2026

- Trained a Random Forest Classifier on the heart disease UCI dataset to predict heart disease based on patient symptoms
- Applied agile methodologies to manage project progress and coordinate task assignments across the team

Country Facts Desktop App

Java

April 2026

- Developed a Java Swing desktop application that retrieves and displays live country facts from the REST Countries API via a search field and formatted results window
- Built custom API handling and JSON parsing logic with input validation and API error handling
- Applied object-oriented design principles including encapsulation, inheritance, abstraction and dependency injection

TECHNICAL SKILLS

Languages: Python, HTML/CSS, C++, Java, SQL, JavaScript, Typescript, JSX

Tools: React, Next.js, Node.js, Git, Docker, MySQL, PostgreSQL, Vercel, Resend, PyCharm, IntelliJ, Eclipse, Jupyter Notebook, Google Colab, Tuleap, VS Code, Excel

Libraries: pandas, NumPy, Matplotlib, Seaborn, Plotly, scikit-learn
